DAY 1

Flight from USA to Guayaquil or Quito, Ecuador. Shuttle to Hotel. (Meals on your own)

DAY 2

Breakfast at hotel, shuttle to airport, flight to San Cristobal. Upon arrival to Puerto Baquerizo Moreno, SAN CRISTOBAL Island, our crew is waiting at the airport to escort you to your anchored yacht. After the welcome briefing, buffet lunch and safety drill, we set

great blue herons, lava herons, American oystercatchers and yellow-crowned night herons. Our **walk** ends at the grottos, deep pools of clear water where we encounter fur sea lions once on the verge of extinction. Before returning to the yacht, there is a **snorkeling** opportunity with loads of tropical fish. As an alternative, you may use the **kayaks** to explore the marine life without getting wet. During lunch, the yacht motors to the other side of the Island which provides for scenic landscapes. Located off the Southern tip or Santiago, SOMBRERO CHINO or Chinese Hat owes its name to its shape. After a wet beach landing with sea lion colonies, we **snorkel** or **walk** the trail that gives way to a primeval landscape of volcanic rubble including cracked lava formations and lava tubes. The lava tubes are fragile and one must be careful to stay on the trail. We find marine iguanas and pairs of oystercatchers. There are good photographic opportunities here as this site conveys a strong feeling that you've come to a very special place in the world. There is a briefing followed by dinner as we anchor in a calm protected area. (BLD)

DAY

On Bartolome, it seems like we are walking on the moon. This young Island is inhospitable to most plants and animals. After a dry landing, climb 30 minutes up stairs leading to the summit of a once active volcano. Along the way, we pause to marvel at lava bombs, spatter cones and cinder cones. From the top of the wooden stairs, we can gaze out across the island for a panoramic view of the island and "Pinnacle Rock", an eroded tuff cone. Down below, crystal clear water is an invitation to **snorkel** from the beach or Zodiac with schools of tropical fish and Galapagos Penguins. On the other side of the Island, encounter sea turtles and white-tipped sharks. This afternoon, we have a dry landing at North Seymour, a small geological uplift. We follow a trail that leads us to swallow-tailed gulls, blue-footed boobies and the endemic land iguanas. Visit the largest colony of magnificent frigate birds found in Galapagos. As we stroll along the beach, we find marine iguanas and sea lions body surf the northern swells. After the walk there is a **snorkeling** opportunity offered in deep water. Passengers who have purchased our **dive** package will have two dives in lieu of visiting North Seymour. (BLD)

DAY 7

This morning we travel by bus to the highlands of SANTA CRUZ Island. The scenery gradually changes as we wind our way through all seven vegetation zones found in Galapagos. Here, we visit the tortoise reserve at one of the private farms in the highlands where we encounter giant tortoises in their natural habitat. We visit Los Gemelos, Spanish for "The Twins", a pair of large pit craters where we find the bright red male vermilion flycatcher. We stop at "the tunnels", the largest lava tubes found in Galapagos. After lunch on board, we visit the Charles Darwin Research Station. Scientists from all over the globe work at the station and conduct biological research from anatomy to zoology. Visitors can see the pen of Lonesome George, the last surviving member of the Pinta Island subspecies. Stroll through the town of Puerto Ayora (population: 20,000) and the largest town in the Galapagos. Buy souvenirs, mail postcards or kick back at an Internet cafe in the social heart of the Islands. Passengers who have purchased our scuba **dive package** will have two dives in lieu of visiting the Darwin Station. Divers can visit the highlands on their return from the dive. Dinner is served on board. (BLD)

DAY 8

This morning we have a dry landing at Punta Suarez, ESPANOLA, where we witness the highest rate of endemic species in Galapagos. Sea lions noisily greet us as we land on their beach. Curious Hood mockingbirds peck at our shoelaces. From April to November, the waved albatross, found only on Espanola, perform their wild mating ritual. Colonies of blue-footed boobies engage in "sky-pointing" to show off for potential mates. Nazca (formerly masked) boobies busily care for their young. Stunning swallow-tailed gulls are the only nocturnal gulls in the world. Red-billed tropicbirds take shelter under the cliffs. We also find Darwin's Finches, Galapagos Doves and Galapagos Hawks. Observe a unique

specie of marine iguana identified with traces of red and green colorings. Colorful sally light-foot crabs crawl along the shoreline near to the famous "blow hole". This is the scene most people envision when they decide to visit Galapagos. During lunch, we motor to the other side of the Island. On our last afternoon in Galapagos, we have a wet landing on Gardner Bay, ESPANOLA (HOOD). Walk along seemingly endless stretches of this white sandy beach where you'll find large colonies of sea lions. There is no trail to follow so this is a chance to explore and you may find a Galapagos Hawk, Darwin's Finches or Hood Mockingbird. **Swim** with sea lions from the beach or just relax on your last glorious day in Galapagos. There's an excellent **snorkeling** site off Gardner Islet with a colorful diversity of sea life near Tortuga Rock in caves covered with invertebrates. Passengers are also permitted to use the **kayaks** at this particular site. This evening, enjoy the Captain's Farewell cocktail followed by dinner and a disembarkation briefing. (BLD)

DAY 9

This morning, we drop anchor in Puerto Baquerizo Moreno, SAN CRISTOBAL. We visit the Interpretation Center opened in 1999. Here we gain a more complete understanding of the natural and human history of the Islands. Afterwards, we head straight to the airport for our flight back to the mainland. Afternoon return flight to Guayaquil or Quito, overnight hotel. (BL)

A note about our Women Only cruise:

Due to the charter status of this 20-person yacht for women, our cruise directors evaluate the number of commitments we have around 4-6 months prior to departure. If we have not filled the boat with women at that time, we may choose to open the tour to all travelers. Please keep in mind that most travelers are women, and while there may be others onboard, our tours support a group of 8-10 women who may opt to travel privately on each day's excursion with one of our knowledgeable naturalists.
